

Medtronic/Physio-Control EMS Fellowship

SAEM is pleased to announce that they are now accepting applications for the 2008 **Medtronic/Physio-Control EMS Fellowship Grant**. The goal of the grant is to develop the academic potential of the selected fellow by providing support for a one-year training grant that develops both their EMS leadership and research skills. Starting this year the application process has been combined into a single application. Interested applicants should apply with the institution at which they would like to be EMS fellow, similar to a federal training grant application. The application should include the applicant's prior experience, training plan, and proposed research project as well as the institutional environment. Applications are due November 1, 2008 and the application directions can be found at www.saem.org.
